Forests and Fins

Ecosystem Connections Drawing

Draw a healthy forest ecosystem full of connections. Ecosystems are a system of living and nonliving parts that interact and depend on one another. Be sure to watch our video that explains the elements of a healthy salmon stream and how to make this drawing:

[Forests and Fins: Spawner.](#)

Be sure to include in your drawing:

- Plants
- Animals
- Non-living parts (light, air, water, soil)
- Arrows that show how different parts of the ecosystem are connected

Materials:

- Paper
- Something to draw with (markers, crayons, pencils)
